Streamlined service delivery Fully configurable

- Comprehensive job and workload overview
- Sample/batch processing with barcode support
- 100% Web and mobile/tablet compatible
- Integrated billing system and reporting tool
- Requester address book & shipment manifests
- Integration with ERP/CRM (SAP, Dynamics...) via API

- Easy test and service configuration
- Report and invoice template setup and options
- Flexible test pricing
- Customizable data fields and forms
- Dynamic data import and export capabilities
- HL7, ASTM, CSV, XMC... integration

Compliancey

- ISO 17015 compliant: full audit trail / result validation
- Electronic signatures and authentication
- Document/data control and versioning
- User activity logs and monitoring
- Data trending and Control charts

Security

- Credentials with possibility of LDAP/AD and SSO
- Multiple user permission levels and groups
- Data Encryption and backup
- Regular security audits and pentests
- Secure API

Ready to use remote web portal

- Requesters, clients or partners can submit requisitions, view order status, download PDF Reports with results, Quotes and Invoices
- Ready-to-use 100 % web extension of LSM Add-on
- Easy to configure web portal, rebrand and embed in your company website
- Patient Portal mode with kit activation

Automation & Instrument Integration

Connect any instrument and build automation workflows to improve efficiency and data integrity.

Any type of instrument of any brand: Analyzers, Diagnostics and Chromatography Systems ...
Easy HL7/ASTM/XMC/CSV, data mapping.
